Auto Flush® Features	Description	Benefit
Object Lock Sensor	Differentiates between actual users and patrons just passing by	Prevents unwanted flushes
Sensor Range Adjustment	Ensures accurate activation in any restroom environment	Prevents unwanted flushes
Dry-Cam Technology	Ensures reliable performance by preventing moisture/water contact with electronics	Eliminates costly repairs and fixture downtime
Retrofit Installation	No water shut-off required	Automates fixtures to a higher level of hygiene in minutes
Courtesy Flush Button	Allows manual mechanical override	Allows fixtures to be flushed easily when needed
24-Hour Courtesy Flush	Ensures fixtures are flushed at least once a day	Keeps traps primed to prevent odors
Low-Battery Indicator (LED/Audio)	Easy, simple reminder when power supply is low	Prevents “dead” units that won’t flush

Auto Flush® Sidemount – Accessories	
No.	Description
401096	High Mount Adapter Kit
401165	Crane Valve Adapter Kit
401239	Teck Valve Adapter Kit
401477	Tempus Valve Adapter Kit

Auto Flush® Clamp – Accessories	
No.	Description
401972	Coyne & Delany/Crane/Rex Adapter Kit
401979	Sloan Gem Adapter Kit
401980	Toto Adapter Kit
401973	Canadian Adapter Kit (Crane/Teck/Tempus)
4805777	Powers Adapter Kit

Auto Flush®

# Auto Flush®

Intelligent technology and smart design best describe the industry’s most reliable automated flusher. With Auto Flush touch-free, automated flushing systems, proven technology ensures optimal long-term performance. Smart design contributes worry-free operation and allows facilities the ability to improve washroom hygiene and image in minutes. You’ll deliver positive health benefits without significant upfront costs.

## Smart Design for Ultimate Ease of Installation

Automating fixtures is easy—with no need to shut off water. Auto Flush systems quickly retrofit existing washroom fixtures. The Sidemount model replaces flush handles, while the Clamp model slides over existing handles. Tank-style toilets also convert easily for improved hygiene.

## Sidemount

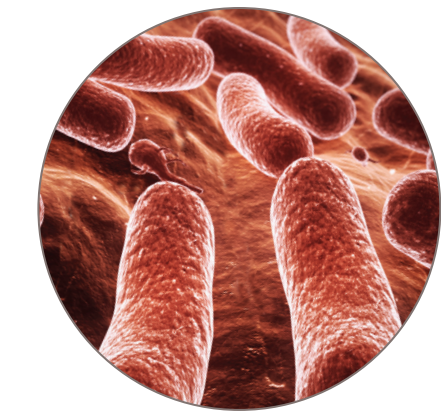

Toilet Model

- User-in-View Indicator
- Lasts 100,000 Flushes
- Installs in Minutes
- Uses 4 C-Cell Batteries

Urinal Model

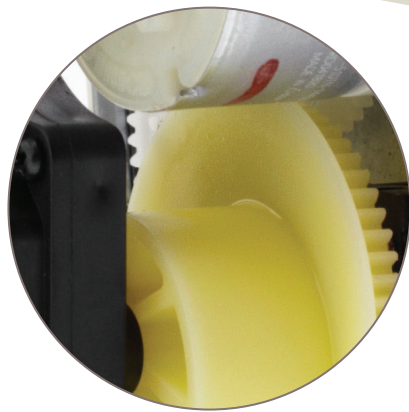

## Improve Health & Wellness

Creating a touch-free washroom environment starts with automating flush valves on both toilets and urinals. In just minutes, facilities can eliminate potential touch points of cross-contamination by installing Auto Flush.

## Enhances Image

Today, patrons expect washroom fixtures to always be clean and presentable. Auto Flush ensures just that. Automating both toilets and urinals to touch-free use demonstrates a commitment to providing a clean, hygienic washroom experience.

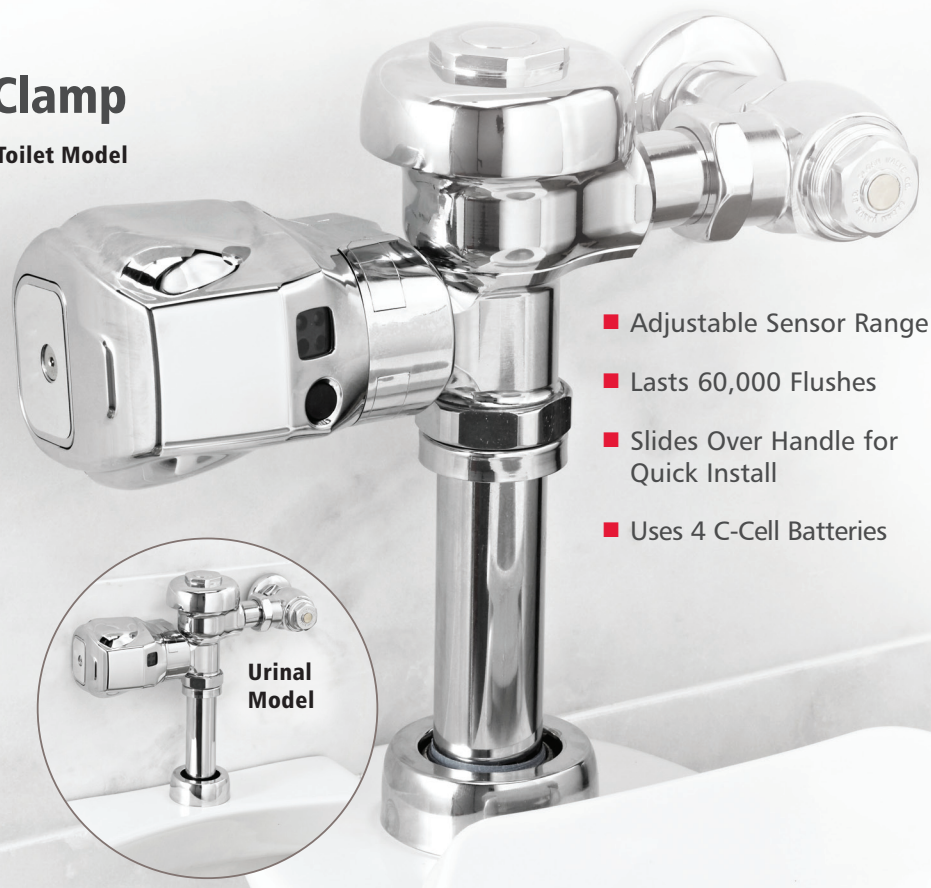

## World-Class Reliability

Patented dry cam-gear technology controls water flow with world-class reliability. The absence of solenoid valves avoids costly repairs and ensures worry-free operation by keeping electronic components separate from water flow.

## Clamp

Toilet Model

- Adjustable Sensor Range
- Lasts 60,000 Flushes
- Slides Over Handle for Quick Install
- Uses 4 C-Cell Batteries

Urinal Model

## Tank

Compact, wireless sensor features three flush modes: object detection, object detection with delay, and wave only. Tank is the perfect solution for restaurants, small office buildings, and patient/resident healthcare facilities.
